

# SAW<sup>37</sup> GRIT

High Performance Tungsten Carbide & Diamond Grit Bandsaw Blade  
37% More from Your Saw

## TUNGSTEN CARBIDE GRIT BANDSAW

*Ideal for cutting materials which are too hard or abrasive for conventional bandsaw blades such as ceramics and wire reinforced rubber.*

### APPLICATIONS

- › Ceramics
- › Glass reinforced Plastic (GRP)
- › Cast Iron
- › Graphite
- › Wire Reinforced Rubber
- › Brittle materials which chip

### FEATURES

- › Continuous or gulleted edge
- › Various Grit Grades
- › Smooth clean cuts

## DIAMOND GRIT BANDSAW

*Best suited for demanding applications where a harder wearing, longer lasting blade is required.*

### APPLICATIONS

- › Glass
- › Quartz
- › Silicon Materials
- › Industrial Ceramics
- › Concrete Materials
- › Carbon Fibre Reinforced Plastic (CRP)

### FEATURES

- › Reversible for extended blade life
- › Continuous or gulleted edge
- › Self Sharpening Grit

## Quality Bandsaw and Bandknife
